professors and mothers  
and examines how  
they navigated their  
professional lives at  
different career stages.  
Kelly Ward and Lisa  
Wolf-Wendel base their  
findings on a  
longitudinal study that  
asks how women  
faculty on the tenure  
track manage work and  
family in their early  
careers (pre-tenure)  
when their children are  
young (under the age  
of five), and then again

1.1 The evolution of human motherhood  
The origins of human motherhood date back to just under two million years ago when our most direct ancestors began to emerge as a separate species from other primates - the appearance of Homo Erectus. Unlike chimps and gorillas, these early human mothers began a new style of
