Web Design is 95% Typography (Oliver Reichenstein, 2006)  
Oliver Reichenstein, the founder and director of Information Architects, told us that the key to successful website design is typography because most of the information found on the web is delivered in written form. In 2006, it was true. In 2016, it is even truer.

The rules of typography design — Yes, I know, rules are meant to be broken, but in order to break the rules in a way that won't make a designer cry you need to learn them first. When working with type and arranging paragraphs on a page we need to pay attention to a few factors and make sure the thing we're designing will be legible and clear.
