To provide quality patient care over a period of time, nurses need a roadmap that guides their actions and quantifies desired outcomes. As a registered nurse, you will be responsible for creating a plan of care based on each patient's needs and health goals. A nursing care plan is a formal process that includes six components: assessment, diagnosis, expected outcomes, interventions ...

Nursing Interventions | Implementing Patient Care Plans ...

The optimal time for pertussis vaccination in pregnancy is between mid 2nd trimester and early 3rd trimester (between 20 and 32 weeks gestation). This is because: levels of pertussis antibodies that are likely to be protective are detected in infants born to mothers vaccinated in the 2nd and 3rd trimesters

Pertussis (whooping cough) | The Australian Immunisation ...

An MRI produces detailed images of the structures inside the body. As the name suggests it uses strong magnets to produce the images. At SSC we have two 3Tesla MRI scanners which are currently the strongest MRI available for clinical use and have the capability of producing scans of the highest quality.

MRI at Sports Surgery Clinic

The first breastfeeding sessions may cause some abdominal cramping because your baby's suckling stimulates the release of oxytocin – a hormone that triggers uterine contractions. And when your milk comes in , usually two to three days after you give birth, your breasts may get swollen, tender, and hard.

Maternal prenatal nutrition and the child's nutrition in the first 2 years of life (1000 days) are crucial factors in a child's neurodevelopment and lifelong mental health. Child and adult health risks, including obesity, hypertension, and diabetes, may be programmed by nutritional status during this period. Calories are essential for growth of both fetus and child but are not sufficient for ...

Breastfeeding initiation rates in Canada have increased considerably in recent decades, from less than 25% in 1965 (Millar & Maclean, 2005) to 88.4% in 2011 (Statistics Canada, 2012). Yet, of the mothers who initiate breastfeeding, some stop after less than one week and close to 25% stop before their infant is one month old (Health Canada, 2012).

Ajwain, ajowan (/ ˈ æ dʒ ə w ɒ n /), or *Trachyspermum ammi*—also known as ajowan caraway, thymol seeds, bishop's weed, or carom—is an annual herb in the family Apiaceae. Both the leaves and the seed-like fruit (often mistakenly called seeds) of the plant are consumed by humans. The name "bishop's weed" also is a common name for other plants. The "seed" (i.e., the fruit) is often ...
