Descartes had set himself a very particular puzzle to solve. He wanted to find a stable point of view from which to look on the world without relying on God-decreed wisdoms; a place from which he could discern the permanent structures beneath the changeable phenomena of nature. But Descartes believed that there was a trade-off between certainty ...

In Western philosophy this philosophical puzzle was referred to by Plato (Theaetetus 158b-d), Aristotle (Metaphysics 1011a6), and the Academic Skeptics. It is now best known from René Descartes' Meditations on First Philosophy. The dream argument has become one of the most prominent skeptical hypotheses. [citation needed]

I. The Mind-Body Problem. There is an age-old problem in philosophy known as the "mind-body problem." One quick way to state the problem is this: what is the relationship between the mind and the body -- between the mental realm (the realm of thoughts, beliefs, pains, sensations, emotions) and the physical realm (matter, atoms, neurons).

The Mind-Body Problem
Philosophy of mind is a branch of philosophy that studies the ontology and nature of the mind and its relationship with the body. The mind-body problem is a paradigmatic issue in philosophy of mind, although a number of other issues are addressed, such as the hard problem of consciousness and the nature of particular mental states. Aspects of the mind that are studied include mental events ...
