Essentials Of Physical Anthropology Larsen

Adaptations and adaptability. Humans have biological plasticity, or an ability to adapt biologically to our environment.An adaptation is any variation that can increase one's biological fitness in a specific environment; more simply it is the successful interaction of a population with its environment.Adaptations may be biological or cultural in nature.

Human Adaptations | Cultural Anthropology

These physical changes continue to refine until we see them as we do today in modern Homo sapiens (Jurmain et al. 2013). You can explore all of the anatomical changes associated with bipedalism in more detail by visiting Step by Step: The Evolution of Bipedalism hosted by the Department of Anthropology at The University of Texas-Austin (optional).

Overexploitation, also called overharvesting, refers to harvesting a renewable resource to the point of diminishing returns.Continued overexploitation can lead to the destruction of the resource. The term applies to natural resources such as: wild medicinal plants, grazing pastures, game animals, fish stocks, forests, and water aquifers.. In ecology, overexploitation describes one of the five ...

Overexploitation - Wikipedia

The gustatory system or sense of taste is the sensory system that is partially responsible for the perception of taste (flavor). Taste is the perception produced or stimulated when a substance in the mouth reacts chemically with taste receptor cells located on taste buds in the oral cavity, mostly on the tongue.Taste, along with olfaction and trigeminal nerve stimulation (registering texture ...

For David Goggins, childhood was a nightmare – poverty, prejudice, and physical abuse colored his days and haunted his nights. But through self-discipline, mental toughness, and hard work, Goggins transformed himself from a depressed, overweight young man with no future into a U.S. Armed Forces icon and one of the world's top endurance athletes.
