Formally, a string is a finite, ordered sequence of characters such as letters, digits or spaces. The empty string is the special case where the sequence has length zero, so there are no symbols in the string. There is only one empty string, because two strings are only different if they have different lengths or a different sequence of symbols ...

representing that the data d is stating S regarding the relationship of some attribute(s) A to some object O in the world. Further assume C(S) to represent the degree of confidence we assign to the given statement S.Then, data is regarded to be uncertain if C(S) < 1 while being precise, i.e., a singleton.Similarly, data is deemed as imprecise if the implied attribute A or degree of confidence ...
