At the same time, the practices of pathology and medicine are evolving at an extremely rapid rate while medical knowledge is expanding exponentially. There is an entire industry based around paraphrasing the current literature for a given specialty because, even within a specialty, you can't read every new study or follow every new development.

Lablogatory - A blog for medical laboratory professionals

Value in health care is the measured improvement in a person's health outcomes for the cost of achieving that improvement. While some descriptions conflate value-based health care and cost reduction, quality improvement, or patient satisfaction, those efforts—while important—are not the same as value, which focuses primarily on improving patient health outcomes.

Defining and Implementing Value-Based Health Care: A ...
