People and Protected Areas in South Asia. Thu, 30 Oct 2008. There is a huge challenge to south Asian protected areas to demonstrate their contribution to biodiversity conservation whilst enhancing the livelihoods of resident communities. The book has 23 papers and most are country-specific (Bangladesh, Bhutan, India, Nepal, Pakistan and Sri Lanka), targeting a diverse set of issues to demonstrate that "sustainable use" of biological resources is necessity not a "strategy".

People and Protected Areas in South Asia | IUCN

The creation of protected areas has been a central element in conservation policy since its beginnings in the 19th century. From their inception, protected areas were conceived as areas of land alienated to the state and managed for the benefit of future generations but to the exclusion of residents. National parks, pioneered in the United States, denied indigenous peoples' rights, evicted ...
