Darwinism designates a distinctive form of evolutionary explanation for the history and diversity of life on earth. Its original formulation is provided in the first edition of *On the Origin of Species* in 1859. This entry first formulates ‘Darwin’s Darwinism’ in terms of five philosophically distinctive themes: (i) probability and chance, (ii) the nature, power and scope of

Darwinism (Stanford Encyclopedia of Philosophy)

Tides are the rise and fall of sea levels caused by the combined effects of the gravitational forces exerted by the Moon and the Sun, and the rotation of the Earth.. Tide tables can be used for any given locale to find the predicted times and amplitude (or "tidal range"). The predictions are influenced by many factors including the alignment of the Sun and Moon, the phase and amplitude of the ...

W.E. Bijker, in International Encyclopedia of the Social & Behavioral Sciences, 2001 The social construction of technology is one approach among several constructivist ways of studying science and technology that emerged in the 1980s. The term 'social construction of technology' can be used to denote two different things. First it is a research approach to study technical change in society ...

Social Construction of Technology - an overview ...

Garment design is an integration of all the design elements including colour, texture, space, lines, pattern, silhouette, shape, proportion, balance, emphasis or focal point, rhythm and harmony. Each of these contributes towards the visual perception of the garment. Line manipulation, for example, can create different visual and psychological effects in clothing (see Table 9.1). 21
