Harley Davidson, Finding Top Dead Center. TDC - YouTube

Sure, many HD engines have a timing window and a mark on the flywheel to tell you when you're at TDC, but it's up to you to figure out which TDC it is. To identify Compression TDC, watch your valvetrain as you rotate the motor in the forward direction.

HAMMER PERFORMANCE - High Performance for your Harley Twin ...

Locate the proper timing marks for your engine. If the shop manual is not available, remove spark plugs, turn engine until front piston is at TDC on compression stroke and identify TDC mark on the flywheel. 2. Connect leads of INDUCTIVE TIMING LIGHT to front spark plug cable, to battery positive terminal and to ground.

Setting Ignition Timing on your Harley

Look into the hole with a flashlight to find TDC. Once your thumb has been pushed off the spark plug hole, use a flashlight to peer down into the hole at how close the cylinder is to the hole itself. Have your friend rotate the motor very slowly as you watch to get it as close as possible to top dead center.

3 Ways to Find Your Engine's Top Dead Center (TDC) - wikiHow

This indicates that the front piston is approaching TDC (top dead center) of the compression stroke. Step 3 Look in the timing port and continue to slowly kick over the engine until the advance mark (vertical line) is centered in the port.

How to Set the Timing on Shovelhead Points | It Still Runs

A stock 1980 with the original electronic ignition should be set with a timing light hooked to the front cylinder spark plug aimed through the timing hole on the high left side of the case just...

What is the correct timing on a 1980 Harley Davidson FLT ...

Look in the timing hole on the primary side of the bike (remove the plug first!)...VERY slowly, bump the engine over a bit with the kicker (or put the rear wheel off the ground and with the bike in high gear use the wheel to move the engine)...you are looking for the TDC mark on your flywheels (stock flywheels up through early 1980 have a small drilled dot low in the timing hole for the TDC mark and a vertical line for the advance mark....after early 1980 the factory changed the TDC mark to ...

Timing a Shovelhead, help!!! - The Jockey Journal Board

Take a Sharpie marker and through that hole put a mark on the edge of the timing cup. The mark must be on the line between the two posts - that is, on the imaginary yellow line in the photo. That's going to become your new timing mark, once you make it permanent.

A Neat Timing Trick - West

Top Dead Center (TDC) When The Piston Is At The Top Of Its Stroke Top Dead Center (TDC) for any internal combustion engine refers to; the point when the piston is at the absolute top of its stroke. So, A piston can be at Top Dead Center (TDC) on the compression stroke and on the exhaust stroke.

Two dots in front of the advance mark with the lighting bolt is TDC for the rear cylinder...(Edit: My Bad, Not TDC, It be the Rear Cylinder Advance) The heart dot is the TDC for the front cylinder....

Ironhead timing question

A timing mark view plug tests engine timing. The view plug flashes a light on the timing tab when the pistons of the engine's cylinder reach the highest point of the compression stroke. Step 1 Insert the thread timing mark view plug in the timing inspection hole.

How to Time a Harley Shovelhead | It Still Runs

The single dot indicates 35 degrees BTDC for the front jug, and is the max advance mark for US bikes. The double dot on the early models indicates TDC for the rear jug. On later models it indicates 20 degree BTDC for the front jug and is the max advance mark for the exported bikes. (Less advance due to poor quality fuel I assume.)

Setting BT Evo Timing - Metro

Your flywheel should have a front-cylinder-advance mark, a rear-adv mark, and the TDC mark. But if you want to determine which mark is which, simply stick something in the front spark-plug hole and feel when the piston is rising then stops. The mark in the window is TDC. Make sure your on the compression stroke (use thumb to feel for it)
